

**FREE
WORKSHOP!**

***How big is Uranus? How big is Mars?
What are the conditions for life on a planet?***

Get these answers and more at a great FREE opportunity for current educators, prospective teachers, and administrators!

Wednesday, October 7, 2009

Lisa Brown, Aerospace Education Specialist with NASA (Johnson Space Center) will conduct two FREE teacher workshops at the Stafford Air & Space Museum, 3000 Logan Road, Weatherford.

Scheduled Workshop Topics include:

The Solar System: learn how various models of the solar system are constructed; and explore new worlds of the solar system

Design challenges & Astrobiology: Design, build & test various spacecrafts for a mission. Perform scientific missions and discover if there is life on a planet!

Following the workshop you can receive your lunar certification!

Pre-Registration is required! You will receive a confirmation number to insure your seat. Please contact the Stafford Air & Space Museum to register. Limited seats!

Call: 580-772-5871 email: director@staffordmuseum.com
